PORT OF SACRAMENTO

SERVING THE REGION

PORT OF *Sacramento*

Dear Neighbor,

At the Port, we do more than ship and receive cargo – we are a long-standing partner of the West Sacramento community and symbolize an important link between our unique heritage and our shared vision for the future.

Although the Port provides a world-class transportation and trade facility to international world markets, we are dedicated to producing good paying jobs for area residents and to ensuring the highest standards of public safety and environmental protections for our neighboring communities.

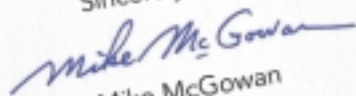

When most residents think of the Port, they also recognized another important contribution – tax revenues. Economic impact studies have indicated that the Port has a connection to over 2,500 jobs, generating personal incomes over \$26 million and providing \$6.2 million in state and local taxes.

Our commitment to the community has compelled us to utilize Port facilities for the benefit of residents throughout the Sacramento region. Each year, we host student and public tours that provide an "outside the classroom" perspective on maritime history, trade and Northern California agriculture and as caretakers of our surrounding environmental habitats.

We are also proud to be the training facility of the UC Davis Rowing Team and other nautical sport and leisure activities.

The Port is a committed partner of our community. We are honored to play a vital role in preserving our unique heritage and contributing to the future vision that we are working together to create.

Sincerely,

Mike McGowan
Port Chairman

Commitment to

Dedication to The Environment

The health and public safety of our community is one of our top concerns at the Port. We work tirelessly to meet or exceed the most stringent environmental regulations that are routinely monitored by the local, state and federal governments. The Port is dedicated to ensuring the highest public safety and environmental protection standards.

Devoted to preserving California's waterways, the Port is using state-of-the-art technology to improve our stormwater treatment facilities in order to protect our water quality and surrounding environmental habitats.

Job Producer

The Port has been on the forefront of efforts to make West Sacramento a community that we can all be proud of by attracting and maintaining good paying jobs and encouraging private investment in local businesses and infrastructure.

The Port has been a positive factor in the job growth and prosperity that has made our community a better place to live, work and raise a family. Currently, the Port generates hundreds of good paying jobs for our community in addition to serving as an important economic engine that helps fuel the economy for the entire region.

Our Community

Good Neighbor

Over the last five decades, the Port has been driven by the goal of being a good neighbor to the business and residents of West

Sacramento who are located near the Port. We have worked hard to develop strong ties with our neighbors and throughout the greater Sacramento region so that we not only deliver a valuable service to the local business community, but also contribute to the local neighboring communities.

Preserving Our History

Since 1849 when the first schooner arrived on the banks of the Sacramento River, the Port has played a vital role in developing our unique heritage and shaping the local culture of West Sacramento. The Port is a critical link

between the greater Sacramento region's past and the future that we are trying to create. Recognizing the symbolic and historic attributes of our waterfront community, the Port is

dedicated to preserving the past and creating a vision for our rapidly developing future.
